

PRE-MEDICATION INSTRUCTIONS

1. Please arrive at your appointed time. Failure to do so will result in having to reschedule your appointment.
2. *****It is important that your child have only clear liquids to drink and no solid food to eat.*****
3. Please do not give your child any other medications without first checking with our office.
4. Your child will be given a liquid mixture of Demerol, a pain medication; and Vistaril; an anti-nausea medication. The amount of medication administered is based on the child's weight and is sometimes referred to as "fruit punch".
5. After your child has been medicated you will both be asked to wait one hour in the tv room before being taken to the treatment room. The treatment itself may take up to an hour.
6. During the treatment, as your child may be breathing a mixture of nitrous oxide (laughing gas) and oxygen, this will add to the comfort of the procedure for your child.
7. Plan on being in our office at least two hours on the day of your visit. A parent or other adult will need to be with your child after the appointment.

WE HOPE THAT THIS INFORMATION WILL HELP YOUR CHILD'S VISIT GO AS SMOOTHLY AS POSSIBLE. ON THE DAY OF YOUR VISIT YOU WILL BE GIVEN ADDITIONAL INSTRUCTIONS TO ASSIST YOU AFTER YOUR APPOINTMENT.
